

We Learn, We Build, We Play with...
LEGO® Bricks

Camp

Jr. Robotics

How would you like to turn your next LEGO® creation into a robot, programmed to do exactly what you tell it to do? The Bricks 4 Kidz® new Junior Robotics camp offers all the fun of building with LEGO® bricks, PLUS the challenge of computer programming! Using drag-and-drop icon-based software that provides an introduction into the world of computer-programming and robotics that will equip children to succeed in a technology-based marketplace. This fun, action-packed week combines real-life skills with real-kid fun!

*All Campers take home a custom mini-figure, and a certificate at the end of the week.

Stop Motion Animation

Light, cameras, action! Use LEGO®bricks to tell YOUR story, complete with music, special effects and all your favorite LEGO® mini-figure characters! In this unique and creative camp, students will plan, script, stage, shoot, and produce their own mini-movie using Stop Motion Animation. Working as a team, students will use LEGO® components to build the set and props, then shoot their movie using a camera. Teams will use movie-making software to add special effects, titles, credits and more. When the movie is complete, campers will impress friends and family with a screening party on the last day of camp. Don't miss your chance to be a movie producer!

*Campers will take home a custom mini figure, a certificate of completion and a hard copy of their movie.
